

AYUSH QUALITY MARK PROGRAMME

Additional Requirements for Ayush Wellness Centres

as per ISO 21426:2018

(Effective immediately)

Introduction

Wellness As A Concept:

There are a number of reasons that have led to the paradigm shift in the delivery of healthcare in the last fifty years and more. The concept of Wellness is not really new but its current application is. The idea of physician's role as a guardian of one's health was there many centuries ago in Ayurveda and other traditional systems of India. The physician was responsible for interpreting and detecting at early stages any imbalance and deviation from normal state, any nutritional deficiencies, mental and emotional states - in order to diagnose and to predict possible outcomes. An early warning symptom helps to alter the unhealthy condition before it turns into a disease state and a complication. The holistic philosophy of Ayush medicine demands that a person must take as much responsibility of self in order to get healed in a holistic way and to fight off a possible disease threat. Ayush remedies , special foods, and lifestyle changes create an optimal regulation of the internal state and when this balance is achieved diseases can be tackled in a much better way and at times deterring the onset of diseases Even aging and longevity is viewed in a different way in the traditional systems of medicine .The wise use of nutrients, exercise, and right mental attitude and thinking will ameliorate diseases and prevent imbalances to ward off diseases responsible to speed up the aging process . Therefore, the wellness concept and dimensions are inextricably interwoven in Ayush that focuses on - Physical health, mental health, diet, nutrition, immunity and yoga.

Ayush Wellness Centres:

Wellness centres are facilities that incorporate clinical and fitness components for a holistic approach. Expressed in a physical form by incorporating conventional and traditional medicine and fitness aspects. These wellness centres will become the trend in the 21st century. Wellness centres and their designs vary widely around the world. But they have one thing in common : a dedication to the pursuit of health, wellness and well being. They are from the smallest hospital based centre on the hospital campus itself to free standing centres designed with dedicated clinical program and the commitment of specialist Doctors and therapists as required, to wellness villages to large hospital projects that include integrative wellness programs along with the fitness and beauty components. The programing and design of wellness centres vary regionally and other parts of the world. Cultural differences are clearly illustrated yet there are common themes. All designers and owners prefer to have programs

that reflect the market demand for clinical, fitness and educational components as well as ancillary spa and salon.

In order to complete the picture, this document will focus on the quality services at Ayush Wellness centres, taking into account their natural healing waters and their proven therapeutic and preventive benefits for health.

The standard ISO 21426 provides requirements for Medical Spas. In order to enhance usability of ISO 21426 in the global context specifically for the purpose of including AYUSH Wellness Centres, there was a need felt to write some additional/ specific requirements to supplement the ISO 21426. Requirements of ISO 21426 apply except where certain modifications are made and the terminology **‘Medical Spa’ is replaced with the ‘Ayush Wellness Centre’.**

Ayush is the traditional medical systems of India comprising of Ayurveda, Yoga & Naturopathy, Unani, Siddha , Homeopathy and Sowa Rigpa

Requirements given in this document must be read in conjunction with the ISO 21426.

1 Scope

This document specifies requirements for the provision of quality services at Ayush Wellness Centres which use therapies and medicines as part of traditional Ayush systems with reference to ISO 21426. Wherever the expression “medical spa” has been used, it shall be read as “Ayush Wellness Centres”.

2 Normative references: Requirements of ISO 21426 applies.

3 Terms and definitions:

3.5 Replace by

Ayush Wellness Centre : A legally recognized health establishment/ facility under medical supervision provided by a registered Ayush practitioner that incorporates the clinical component of Ayush therapies as practiced in the traditional systems along with the fitness component which may include activities such as yoga, exercises, meditation, walking paths, salt cabins, water pools etc. for a holistic approach to health and wellbeing
